

Installation Guide

This installation guide will help you create a VPN-connection to our servers. This is only needs to be done once after you start using our service.

Part 1: Create a **VPN connection**

Part 2: Connecting to **Hidden24**

Part 3: **US IP address** or Swedish IP address

HIDDEN24

Part 1: Create a VPN connection

HIDDEN24

HIDDEN24

Step 1: Open System Preferences.

Click on the Network icon

Step 2: Click on the **Network** icon.

HIDDEN24

Step 3: Click the “+” button at the bottom left corner to **add a new service** (Type in your Mac **Administrator Name** and **password** if asked).

HIDDEN24

Step 4: Select **VPN** as the **Interface** and **L2TP over IPSec** from the **VPN type** drop-down menu. Enter **Hidden24** as **Service Name** and click **Create**.

HIDDEN24

Step 5: In the **Server Address** field, enter **connect.hidden24.co.uk**. Enter your Hidden24 **Account Name** (the Username you have chosen when creating your account on Hidden24.co.uk).

HIDDEN24

Step 6: Check the option “Show VPN status in menu bar” and click on “Authentication Settings”.

HIDDEN24

Step 7: Select “**Password**” and enter your password for Hidden24 account (the Password you have chosen when creating your account on Hidden24.co.uk).

Step 8: For “**Shared Secret**”, enter **AnonymousMe** and click **OK**. (be careful with upper and lower case).

HIDDEN24

Step 9: Click to open **Advanced** settings.

HIDDEN24

Step 10: Check the **“Send all traffic over VPN connection”** and click **OK**.

HIDDEN24

Step 11: Click **“Apply”** to save all settings.

Part 2: Connect to Hidden24

Success! With your newly created connection, you are now able to connect to Hidden24. Start using the web anonymously with a UK IP address.

HIDDEN24

Part 3:

How to get an American or Swedish IP address

With Hidden24, you can also get a US IP-address or a Swedish IP-address (in addition to the UK IP-address you get by default). An IP-address from USA can for example be useful if you want to watch US Netflix, or access other services that require a US IP address..

All of the country options are equally safe, and will protect you from online threats and guard your privacy.

HIDDEN24

Create an additional VPN-connection for each country (here we are using the US as an example)

Create **one more VPN-connection** (a second connection), by following the installation guide one more time, but with **two differences** in the process.

- Difference 1: Give the new VPN connection a different name, for example "**Hidden24 US**" instead of just "Hidden24"
- Difference 2: Use the server address "**us.hidden24.co.uk**", instead of "connect.hidden24.co.uk".

Apart from these two differences, everything else should be the same. Same Username and Password, same shared secret / PSK.

Repeat the process one more time if you also want a Swedish IP address, but then use the server address "**sw.hidden24.co.uk**".

How do I choose which IP-address to get connected to?

Simple: When you want a UK IP-address, activate the first connection named "Hidden24". When you want a US IP-address, activate the other connection named "Hidden24 US". You can switch between the two, by activating and deactivating each connection.

HIDDEN24

Summary, countries

These are the countries available to you. This table will be updated as we add new countries in the future.

Get IP-address from this country	Country code	Suggested name of connection	Server address for the VPN connection
United Kingdom	UK	Hidden24	connect.hidden24.co.uk
USA	US	Hidden24 US	us.hidden24.co.uk
Sweden	SW	Hidden24 SW	sw.hidden24.co.uk

Do you have feedback on the guide, or do you need more help?
