

How to get an American or Swedish IP address

With Hidden24, you can also get a US IP-address or a Swedish IP-address (in addition to the UK IP-address you get by default). An IP-address from USA can for example be useful if you want to watch US Netflix, or access other services that require a US IP address..

All of the country options are equally safe, and will protect you from online threats and guard your privacy.

HIDDEN24

Create an additional VPN-connection for each country (here we are using the US as an example)

Create **one more VPN-connection** (a second connection), by following the installation guide one more time, but with **two differences** in the process.

- Difference 1: Give the new VPN connection a different name, for example "**Hidden24 US**" instead of just "Hidden24"
- Difference 2: Use the server address "**us.hidden24.co.uk**", instead of "connect.hidden24.co.uk".

Apart from these two differences, everything else should be the same. Same Username and Password, same shared secret / PSK.

Repeat the process one more time if you also want a Swedish IP address, but name the connection "Hidden24 SE", and then use the server address "**se.hidden24.co.uk**".

How do I choose which IP-address to get connected to?

Simple: When you want a UK IP-address, activate the first connection named "Hidden24". When you want a US IP-address, activate the other connection named "Hidden24 US". For a Swedish address, activate "Hidden24 SE".

You can switch between all of them, by activating and deactivating each connection.

HIDDEN24

Summary, countries

These are the countries available to you. This table will be updated as we add new countries in the future.

Get IP-address from this country	Country code	Suggested name of connection	Server address for the VPN connection
United Kingdom	UK	Hidden24	connect.hidden24.co.uk
USA	US	Hidden24 US	us.hidden24.co.uk
Sweden	SE	Hidden24 SE	se.hidden24.co.uk
